Intensive Behavioral Health Services - Group & Individual

BEACON LIGHT
BEHAVIORAL HEALTH SYSTEM

Intensive Behavioral Health Services (IBHS)- Group and Individual services are a community-based program previously known as CSBBH that is offered to school districts throughout the Commonwealth. Beacon Light Behavioral Health System has partnered with various school districts in Pennsylvania to offer mental health treatment in a flexible Group and Individual Behavioral Health model.

HOW DOES IT WORK?

The IBHS-Group and Individual program is a team approach model that complements school-district interventions, district prevention programs, educationally-based emotional and behavioral support programs, plus other types of community services such as 24/7 on-call and a case management component.

When a student could use more support, a referral is made to the IBHS team. School personnel will contact parents to get permission for students to be considered for this specific level of service.

If permission is given, the MT will reach out and meet with the family and student to get some background information, schedule them for a Written Order, and complete a 15 day assessment process.

Through the Written Order and assessment period, the MT will pull all the information together and work with everyone to develop an Individual Treatment Plan (ITP) for the student.

WHO IS ON THE TEAM?

A Mobile Therapist (MT) who is a licensed/ licensed-eligible clinician will provide services to the child and family within the school, home, and community settings. The MT is employed by Beacon Light Behavioral Health System, but works closely with school staff and other identified treatment team members. The MT will also help develop a plan to deal with a behavioral health crisis. The MT will provide individual, group, and family therapy as needed, and talk with everyone working with the child. The MT will also coordinate services across the school and home settings and will supervise the care provided by the Behavioral Health Technicians.

A Behavioral Health Technician (BHT) has a four-year college degree and works under the direction of the Mobile Therapist. The BHT works with the child at school and, if necessary, in the home or community. A licensed psychologist or psychiatrist will provide on-going consultation to the IBHS-Group and Individual Team.

THE CLINICAL MODEL

The clinical model is a 24/7 service, which utilizes these functions:

1. Clinical Interventions (individual, family, and group therapy)
2. Case Management
3. Crisis Services
4. Consultation

Services are private and confidential. All students and parents will be asked to sign a release to share information with the School. Information shared will include things like the main goals for sessions or the number of sessions needed. There is no charge to parents or students for this service, as it is funded by Community Care.

ABOUT BEACON LIGHT

Beacon Light Behavioral Health System was founded in the early 1900's to provide services to children abandoned or orphaned by the early oil and lumber industries. Throughout its history, the agency has provided quality care to young people. As the needs of our society changed, Beacon Light Behavioral Health System evolved into a private, not-for-profit social service agency providing quality, professional behavioral health and educational services.

Beacon Light Behavioral Health System's continuum of care includes multiple programs of varying intensity across a broad geographic region. Regardless of the location and type of service accessed, qualified mental health treatment professionals provide individualized treatment planning and care
